Hatz

Unified AI. Real Results. Built for Your Business.

80+ LLM Models | **No-Code Workflows** | **1 Unified Platform**

What is Hatz AI?

Hatz AI is an all-in-one AI platform that provides access to multiple large language models (LLMs), no-code workflows, and connects to AI-enabled tools all in a secure environment.

The Hatz Difference

The AI Hub

80+ models including GPT-4o, Claude, Gemini, Llama, and Mistral.

Branched chatting to compare LLM outputs side-by-side.

Usage analytics to track adoption across your team.

Workflows & Automations

No-code builder to automate multi-step processes in plain language.

Workshop Assistant reviews, writes, and builds automations for you.

Discover Community with pre-built apps, agents, and templates.

Integrations & Tools

Connected to your tools: Microsoft 365, Google Workspace, LinkedIn.

Web research via Exa, Tavily, Google Search, Firecrawl, Perplexity.

File generation: Word, PowerPoint, PDF, Excel, and images natively.

Why Businesses Choose Hatz AI

Security

Your conversations are kept confidential and are never used to train large language models.

Scalability

Easily expand AI capabilities as your organization grows or needs change.

Support

Benefit from Hatz AI's dedicated support team and self-service AI training resources.
